Start every day
SuperSoft

The latest non-electric,
high performance water softener.

...with the super efficient, super economical, super smart SuperSoft.

Non-electric

Our system is powered purely by water, which means it's easy to install, and no tricky settings, adjustments or risk of malfunctions.

Here's the super part:

The clever SuperSoft monitors your water use and only processes the water you need, eliminating waste and reducing energy use.

Twin-tank design

The SuperSoft is one of the most compact and efficient water softeners available; it even fits under your kitchen sink.

Here's the super part:

We designed and patented the first twin cylinder non-electric tank. It guarantees maximum efficiency and provides continual soft water at full flow 24/7.

Soft water rinse

Every operation the SuperSoft makes is carried out in soft water, so our system works better and lasts longer, saving you money and keeping them out of landfills.

Here's the super part:

SuperSoft technology has been known to last for over 30 years and comes with a 5-year guarantee.

Just add salt

All you need to maintain your SuperSoft system is salt. Simply top up with salt blocks when required and it's ready to go.

Enjoy the luxury of soft water, all day every day...

Freshen up

Jump into a crystal clear shower (singing is optional). Step out and admire how shiny your hair is and how beautifully clean and soft your skin is, thanks to soft water.

Dry off

Snuggle up in a SuperSoft, fluffy towel and slip on your feel-like-new clothes.

* Results from a recent talkhealth product trial, using Kinetico softeners

When you add soap to hard water it won't lather properly and leaves nasty scum. A SuperSoft water softener will bring back the bubbles, giving you truly cleansed and beautifully soft skin.

Towels washed in hard water quickly become scratchy and faded. Keep them fluffy and bright when washed with SuperSoft water.

Spend less time cleaning

Live your life free from limescale - giving you more time to enjoy your sparkling, SuperSoft home.

Get the kettle on

Fill up your gleaming, scale-free kettle. Enjoy tea the way it's supposed to be, pure, clear and full of flavour.

No sooner have you cleaned away those limescale deposits - they're back. Keep shower heads, taps and sinks cleaner for longer, without all the effort.

Ever wondered why your tea is covered with a filmy layer? This nasty surface is caused by hard water. Changing to soft water means clear, pure, tasty tea (minus the scum).

After a long day...

Don't be scared to turn up the heat. With a scale-free central heating system and pipes, getting warm is that much easier and cheaper!

Save on the weekly shop

Save on cleaning products, hair care products and replacing broken appliances. With SuperSoft you'll need up to 75% less soap and detergent, saving you time and money.

“Official government figures confirm that just 2mm of scale on appliances such as washing machines reduces efficiency by up to 12%.”

hard water

soft water

hard water

soft water

When hard water is heated, the magnesium and calcium separate to form thick, crusty limescale inside your heating system and appliances.

Scale builds up in pipes and radically cuts short the life of your household appliances. You'd be shocked by the unseen damage occurring every day in your home.
